

**OS-201B: OneStream Certified Professional (OCP)
Core Platform Architect BETA Exam**

Beta Exam Study Guide v1.0

Exam Description

Candidates can validate their technical knowledge and competency by becoming a OneStream Certified Professional Core Platform Architect based on their specific area of expertise on OneStream 8.x. To achieve this level of certification, candidates must pass this online, proctored exam that is based on a combination of OneStream training material, commonly referenced product documentation, and real-world scenarios. This exam is comprised of both traditional multiple-choice items and performance-based items.

This exam targets IT professionals using OneStream in an Architect role. This certification exam measures candidate knowledge and skill covering the following topics:

- Consolidation/Planning Concepts
- Data Integration
- Workspaces
- Security
- Rules and Assemblies
- Workflow
- Metadata and Dimensionality
- Data Management

Recommended Experience

- 2-3 years in the Implementation and Architect fields.
- 2-3 years working with OneStream software.
- Has experience/knowledge in areas of Accounting/Finance and/or Information Technology.

If candidates do NOT have prior experience with this product, it is recommended that they complete training, although training alone may not provide a candidate with the knowledge and skills required to pass the exam. If a candidate has experience with OneStream, they may find an online course equivalent to be sufficient. Be cautioned that attendance in a training course does NOT guarantee passage of a certification exam. A combination of training and successful, on-the-job experience are critical to providing candidates with the knowledge and skills needed to pass the exam.

What to Expect While Taking an Exam

The exam will be online and remotely proctored through video.

Familiarize yourself with the proctor experience by reviewing the instructions in the [registration guide](#).

It is the candidate's responsibility to ensure they have the necessary hardware (e.g., computer, large enough monitor, built in webcam or external USB webcam, power cords) and stable internet connectivity. Note that if a candidate chooses to use an external monitor instead of a laptop monitor, the candidate is responsible for providing their own external webcams for use during exam remote proctoring.

There are several systems that work together to deliver OneStream Software exams. It is essential for you to test the requirements of each system prior to your scheduled reservation to avoid issues on test day.

Take these important steps to be sure that you will be able to take your test:

- You will need TWO cameras for your exam: One on your laptop and one on your mobile device.
 - Download Google Meet for FREE on your mobile device.
- Verify your sound, camera, and microphone all function in both sample meetings.
 - Use a supported browser: Chrome, Firefox, or Edge (NOTE: Safari and Internet Explorer are unsupported).
 - Turn off your popup blocker.
- Verify you can complete this [5-question quiz](#) PRIOR to exam day
 - You must verify your computer and testing location both meet the minimum requirements. Perform these verification steps EARLY and from the same PRIVATE location and room where you will take your exam, using the SAME computer you will use when you take your exam.
- All background applications and processes must be disabled, as they could interfere with exam performance.
- For best results, do NOT test on a work computer or Chromebook; there may be security configurations on your work computer that could affect exam performance.
 - It is common for companies to set up VPN and network filters that will interfere with your exam. Your IT department can add settings to allow your exam to function properly, but it may take a few days. If a candidate is unable to test due to interference with background applications and processes, the exam appointment and fee will be forfeited, and the candidate will need to reschedule their exam and pay a retake fee.
 - If you experience issues using a company computer or sitting at work, ask your IT department to following the instructions in [this guide](#), which may resolve the issues.

Prohibited Equipment

- Use of cell phones and/or tablets for taking the exam is NOT allowed. They are to be used for proctoring purposes ONLY.
- You must remove your smart watch, any listening devices (other than hearing aids), and check your pockets.

Note: Dual monitors are NOT allowed for OneStream Certification Exams. However, due to the small size of laptop screens, external monitors are permitted if the laptop stays CLOSED. Two webcams are still required, so candidates must provide their own external webcams for the remote video proctored exam session to allow the proctor a full view of the candidate, and the candidate's surroundings, including the desktop.
