

ON-DEMAND TRAINING

ONESTREAM SOLUTIONS

Implementing OneStream Financial Close (OFC) Account Reconciliations

Course Description

This course is geared toward those who plan on implementing the Account Reconciliations solution into their OneStream application. This course introduces the purpose and benefits of the Account Reconciliations solution and explains how to upload the solution into an application. Additionally, the course covers typical use cases, what it looks like to view the solution from an end-user perspective, the fundamental components of the solution, how to apply testing and validation, and common troubleshooting techniques.

Learning Objectives

After completing this course, learners will be able to:

- Define the Account Reconciliations solution.
- Identify the purpose of the Account Reconciliations solution.
- Identify the fundamental components of the solution.
- Define the most common use cases for the solution.
- Analyze basic template use cases and schedule type use cases.
- View the solution from an end-user perspective.
- Identify how settings are configured for an end user.
- Configure the solution around common use cases.
- Validate proper setup and configuration.
- Identify and resolve common errors.

Who Should Take This Course

This course is intended for seasoned administrators and OneStream implementers.

Prerequisites and Advanced Preparation

Prior to taking this course, you should complete the following courses, or possess equivalent knowledge plus at least 1 year of experience with the OneStream platform:

- OneStream Essentials: Getting Started with OneStream
- OneStream Essentials: Implementing OneStream
- OneStream Essentials: Configuring Core Application Security

Duration

- On-Demand: 10 Hours

Registration

This course is offered as self-paced On-Demand.
