OneStream Customer Recommended Learning Paths

OneStream customers are able to complete courses in an order of their choosing, assuming course pre-requisites are met. The illustrations below demonstrate a recommended flow of consumption by OneStream Global Education Services.

### CURRENT COURSE OFFERINGS BY CATEGORY

#### STARTING POINT
- Getting Started with OneStream
- Application Build for Administrators
- Configuring Core Application Security
- Implementing OneStream
- Level 2: Financial Model Rules

#### ESSENTIALS
- OneStream Administration
- Building Basic Reports
- Configuring Core Application Security
- Building Basic Dashboards

#### SPECIALTY
- Level 2: Financial Planning
- Level 3: Dashboards
- Level 2: Specialty Planning
- Level 2: BI Blend
- Implementing OFC Account Reconciliations
- Sensible Machine Learning Foundations
- Implementing OFC Transaction Matching

#### MARKETPLACE
- Implementing OFC Account Reconciliations
- Sensible Machine Learning Foundations
- Implementing OFC Transaction Matching

#### ARCHITECTURE
- Level 2: BI Blend
- Smart Integration Connector
- Designing an Application

### EXAMPLE LEARNING PATHS BASED ON ROLE

#### ADMINISTRATOR READINESS

**PRE-IMPLEMENTATION / PRIOR TO DESIGN**
- Getting Started with OneStream
- Application Build for Administrators

**EARLY IMPLEMENTATION**
- Building Basic Reports
- Configuring Core Application Security
- Building Basic Dashboards

**MID-IMPLEMENTATION**
- Level 2: Financial Model Rules
- Level 2: BI Blend
- Level 2: Specialty Planning

**LATE-IMPLEMENTATION**
- Associate in Administration Certification Exam
- Lead Architect Certification Exam

**IMPLEMENTATION FOUNDATIONS CERTIFICATION EXAM**
- Implementation Foundations Certification Exam

#### PLANNING ADMINISTRATOR
- Administrator Readiness
- Level 2: Financial Model Rules

#### POWER USER
- Getting Started with OneStream
- Building Basic Reports

LEARNING PATHS AND COURSES

Who should a customer or partner contact if they have training questions?
Contact training@onestreamsoftware.com.

How can I find training classes taught by OneStream Authorized Training Partners?
Visit onestream.com/training/ and scroll to Training Locations to find a OneStream Classroom or an Authorized Training Partner.

Who should go to training?
Project managers, consultants, administrators and business analysts / power user should be trained where possible, before the start of a project. However, the number of users trained depends on the size and complexity of the project.

Depending on company size and implementation, OneStream recommends that at bare minimum one administrator complete a learning path matched to their implementation, starting with the Administrator Readiness Path. Additionally, anyone filling the role of a “report writer” should complete the Power User Learning Path.

A. Small to Medium Projects: OneStream recommends minimum training for 2 people on 3 courses. This includes one administrator following the OneStream Administrator Readiness Learning Path and a business analyst or power user following the OneStream Power User Learning Path. Where the project includes a OneStream specialty solution such as OneStream Financial Close (OFC), additional training will be required on that specific specialty solution.

B. Medium, Large or Complex Projects: OneStream recommends training for 3 or more people on 3 courses per work stream such as consolidation and planning. This includes functional and advance administrators following the OneStream Administrator Readiness Learning Path and a business analyst or power user following OneStream Power User Learning Path. Additional training and an additional person could be required for specialty solutions.

What is the difference between the OneStream Administrator course for the Implementing OneStream (IOS) course and the Application Build for Administrators (ABA) course?
Business analysts or power users should follow the OneStream recommended Power User Learning Path. Customers with large and complex reporting needs are recommended to have a person taking the Building Basic Reports (BBR) course. Projects with simple and moderately complex reporting needs can have their functional administrator take the Getting Started with OneStream (GSWO) and ABA courses.

What does oneStream recommended Power User Learning Path include?
Administrators should follow the OneStream Administrator Readiness Path, which can be modified to match your implementation needs base on size, complexity and preferences. Customers with a DIY preference can train an advanced administrator; to achieve this, they can swap the Application Build for Administrators (ABA) course for the Implementing OneStream (IOS) course. Business analysts or power users should follow the OneStream recommended Power User Learning Path. Customers with large and complex reporting needs are recommended to have a person taking the Building Basic Reports (BBR) course. Projects with simple and moderately complex reporting needs can have their functional administrator take the Getting Started with OneStream (GSWO) and ABA courses.

What is the difference between the OneStream Administrator course and the Application Build for Administrators (ABA) course?
ABA was designed as our staple instructor-led course for everyone to take, whether they were at the beginning of an implementation or new administrators for an existing application. The new OneStream Administration course (currently only available as on-demand) focuses on helping administrators who already have access to an application and need to maintain it whilst improving their understanding of wider OneStream community resources and topics. In Q1 2024 the course will also be made available as instructor-led, replacing ABA.

Who should go to training?

What is the difference between the OneStream Administrator course and the Application Build for Administrators (ABA) course?
ABA was designed as our staple instructor-led course for everyone to take, whether they were at the beginning of an implementation or new administrators for an existing application. The new OneStream Administration course (currently only available as on-demand) focuses on helping administrators who already have access to an application and need to maintain it whilst improving their understanding of wider OneStream community resources and topics. In Q1 2024 the course will also be made available as instructor-led, replacing ABA.

Besides the core OneStream project implementation and administration team, who else should complete training?
Anyone that is part of the project implementation team or who will use the outputs of OneStream to make business decisions should complete the GSWO course. Additionally, the implementation team should create a training and communication plan to roll out to OneStream end users following implementation to drive understanding and adoption.

What does end user training consist of? Who creates the plan and executes it with them?
End user training is usually prepared and delivered on the project with or by the implementation team or by an experienced OneStream customer administrator, who has completed the GSWO, ABA or IOS, and BBR courses. Power users should attend the GSWO and BBR courses.
What additional training should I consider when taking ownership of my implementation after a “go-live” with a OneStream implementation partner?

Functional administrators who need more information after completing the Administrator Readiness Learning Path could consider the IOS and or Designing an Application (DaA) course. These courses are geared primarily towards implementation consultants but offer more application build insight and context. This could serve as a refresher in some areas and greater depth in others. The DaA course covers advanced design and build concepts around OneStream Metadata, Workflow, Rules and BI Blend. Specialty courses should also be considered if you are adding specialist solution such as Cash Planning, OFC and more to your application.

How do I help my organization embrace “the new way” after implementation?

For example, with the simple, but sticky changes like moving from SmartView to OneStream’s version.

From a technical training perspective, empowering power users with GWSO plus BBR can help the transition.

How do I maintain the knowledge of my administrators, power users, and end users over time as the organization changes, and to keep current with the product?

Administrators can stay current in a range of ways including: participating in ONECommunity forums, attending Splash events, completing platform Release Differences training, webinars, podcasts, and other micro-courses and content available on OneStream Navigator and with the Navigator Passport subscription.

What is Release Differences training and how is it different from other GES training?

Release Differences training provides a technical explanation of new or changed product features and is made available alongside each new OneStream software release. You should view this content only after you’ve built a foundational understanding of the product, for example through the Administrator Readiness Learning Path. Release Differences training is freely available to OneStream customers and partners, and can be found on OneStream Navigator with titles such as “7.4.0 Platform Release – March 2023.” Note that Release Differences training excludes hands-on lab exercises.

How do I advance my skills beyond the fundamentals?

Consider advanced courses like Level 3 Dashboards, engage other professionals on ONECommunity and watch for new learning assets releasing on OneStream Navigator in the coming months, such as: QuickTips videos, Tech Talks, Power Hour webinars, the official OneStream Podcast and advance usage videos.

Will completing training earn Continuing Professional Education (CPE) credits?

Yes, OneStream’s training is compliant with the National Association of State Boards of Accountancy (NASBA) requirements to issue CPE credits. See the course description for how many credits are associated with each course.

After determining my learning path, can I bookmark the courses I need to complete in OneStream Navigator?

Yes, learners are able to bookmark courses in OneStream Navigator. You can also find courses that you have completed in your Navigator transcript.

Can I “test out” of a course?

No. OneStream Navigator marks a course complete when you pass all in-course assessments with 70% or higher and attest to completing the hands-on lab exercises (if applicable).

CERTIFICATION

Do I need to take all courses shown in the learning path before taking a certification exam?

No, the paths shown are examples. Check the course or OneStream Certified Exam description for prerequisites and recommended study.

Will these courses help prepare me to become OneStream Certified?

Yes. Most courses include lab exercises that provide practical hands-on experience with the product, which will help consultants and administrators prepare both for the real world and OneStream Certification Exams. Refer to Certification Exam Study Guide for a full list of resources to prepare.

What is the difference between “recertification” and maintaining an “active certified status”?

Recertification is when someone has already passed an exam and has decided to pass a newer version of an exam (i.e., a completely different exam). Maintaining an active certified status means that you are already OneStream Certified and have received a notice to complete continuing education to extend your certified status from the date it was originally earned.
PURCHASING

Is it possible to receive a higher discount on training purchases if my company buys in volume?
Yes. Companies can receive volume discounts when pre-paying for training. Discounts start with volume purchases of $25K USD. We also have special discounts with 1- and 3-Year Navigator Passport subscription packs (starting with 5 Learners):

- **1-Year Passport Subscription Pack:**
  - 5-9 Learners = 20%
  - 10-14 Learners = 25%
  - 15-19 Learners = 30%
  - 20+ Learners = 35%
- **3-Year Passport Subscription Pack:**
  - 5 Learners (minimum) = 40%

Will I be able to revisit courses that I have already completed? For example: brushing up on Administrator Readiness Learning Path courses after implementation is complete.
Yes, and this is strongly encouraged.

How long will I have access to a course if I purchase à la carte?
1. 90 calendar days.
2. If you purchase the Navigator Passport subscription, the course will be available for the duration of your subscription contract (a minimum of one year).

If I attend an Instructor-Led Training (ILT) class, will I automatically get access to the equivalent on-demand training in OneStream Navigator?
No. We encourage you to consider purchasing the Navigator Passport subscription to access all the on-demand content available, both to refresh on what you learned in an ILT course and to pick up new knowledge and skills. The Navigator Passport subscription will also entitle you to 25% off ILT purchases during the term of your subscription.

Am I able to preview a course before purchasing?
Yes, the first lesson of each course is available for preview in Navigator, though the size of the lesson varies by course. Note that lab exercises are only available once a course is purchased à la carte or through a Navigator Passport subscription.
