

ON-DEMAND TRAINING / INSTRUCTOR-LED TRAINING

First Project Readiness

The courses that comprise the First Project Readiness learning path are available on-demand in OneStream Navigator and the Navigator Passport subscription. Select courses are also available as instructor-led training with hands-on labs.

The following five courses are part of the *OneStream Essentials Series* and serve as the replacement courses for Application Build for Consultants (ABC). These courses cover the material in the previous ABC courses *plus* additional content* to enhance the knowledge of the participant.

Course Descriptions

OneStream Essentials: Getting Started with OneStream

- This course is intended for learners new to the OneStream product. This course provides a high-level overview of the basic concepts of a OneStream application. It introduces the learner to navigating an application, the common business processes used, metadata components and Dimensions, Cubes, Workflows, and the different reporting options.
- This course is comprised of two separate parts: the first part is a freely available self-paced, on-demand eLearning without labs. The second part is a collection of labs, which is available to passport subscription holders and which can be used together with the free version.
- Estimated time to complete is 8-9 hours without labs and 10-12 hours with labs.

OneStream Essentials: Building Basic Reports

- With this course, the learner will develop the necessary skills and knowledge required to create effective reporting tools in OneStream. The learning journey includes the basics of recommending and building reporting options based on the metadata, the development of performant Cube Views, the creation and use of Report Books, and the use of Spreadsheet for Quick Views. You'll be shown how to make the most of the Member Filter Builder, how to use Parameters, and how to bring calculations into reports.
- This course is available either as an Instructor-Led Training or On-Demand with self-paced eLearning, quizzes, assessments, and hands-on lab exercises.
- Estimated time to complete is 15-17 hours (on-demand) or 3 days (instructor-led).

OneStream Essentials: Implementing OneStream

- In this course, the learner will obtain the necessary skills and knowledge to implement OneStream. The course introduces the learner to the project phases of a typical OneStream implementation, followed by building a basic Dimension Library, using Cubes and Extensibility, implementing Workflows, how to query data, running calculations, and Workflow design.
- This course is available either as an Instructor-Led Training or On-Demand with self-paced eLearning, quizzes, assessments, and hands-on lab exercises.
- Estimated time to complete is 24 hours (on-demand) or 5 days (instructor-led).

OneStream Essentials: Building Dashboards

- This course is the starting point for anyone who needs to create or maintain dashboards in OneStream. In this highly practical learning experience, learners will acquire essential skills to work with an array of dashboard use cases, including dashboards for reporting, dashboards for customizing the OneStream user interface and dashboards to build solutions.
- This course is available either as an Instructor-Led Training or On-Demand with self-paced eLearning, quizzes, assessments, and hands-on lab exercises.
- Estimated time to complete is 18 hours (on-demand) or 3 days (instructor-led).

OneStream Essentials: Configuring Core Application Security

- In this course, the learner will obtain an introduction to OneStream security concepts. Participants will learn about configuring security for users, groups, dimensions, cubes, and workflows.
- This course is comprised of self-paced, on-demand eLearning and an assessment.
- Estimated time to complete is 2 hours.

Content Completion and Measured Assessment

In order to earn the First Project Readiness micro credential, a minimum of 70% or higher achievement on the assessments for all courses and attest to full participation in the labs (if applicable).

Additional information for consultants in OneStream Navigator:

- Certification exam preparation webinars
- Access to the official OneStream Podcast archives, QuickTips and Tech Talk content
- OneStream Power Hour webinars and new micro courses offerings to stay up-to-date
